

DFSA BLOOD AND URINE SPECIMEN COLLECTION KIT – PATIENT INFORMATION AND CONSENT

Law enforcement agency: _____ Case number: _____

Consent for specimen analysis for drug facilitated sexual assault

The history of the incident I have reported is either indicative of, or suspicious for, a potential drug facilitated sexual assault. To determine if I ingested an unknown substance, samples of my blood and, or urine may be sent to a forensic laboratory for analysis.

The methods used to analyze the specimens submitted cannot differentiate between substances I ingested voluntarily and those I may have ingested without my knowledge. Reports of the analysis will include all identified substances found in the specimens including alcohol, prescription, non-prescription and recreational drugs. These reports will become part of the records.

I give permission for samples of my blood and, or urine to be submitted to a forensic laboratory for analysis.
